*Our expert insights help empower your business decisions*

**W**ell-regarded as an industry leader on multiple continents, EFI Global has skilled and experienced professionals and technical specialists that carry out in-depth investigations, deal with a full range of losses, and provide immediate response to clients worldwide. Our service teams are dedicated to providing technical excellence, timely and accurate work product, and ultimately demonstrating value to our clients. We are committed to providing total assurance.

# EXPERT

# SOLUTIONS

## Engineering services

With experts in a variety of fields, we can serve as a single source for all of your engineering needs. Our engineers and strategic partners are equipped with the technology, testing equipment, laboratories, tools and experience needed to solve even the most difficult cases. Whether your project requires a simple evaluation or an exhaustive investigation, we pride ourselves on delivering the same quick response, in-depth analysis and timely reporting for each project.

- Expert witness testimony
- Forensic engineering
- Material science
- Mechanical and electrical engineering and failure analysis
- Metallurgical and materials failure analysis

## Fire investigation services

We offer expert investigation services for residential, commercial, industrial, vehicle, equipment and marine fires to help adjusters effectively manage and resolve claims. We understand the importance of constructing timely, thorough and well-supported fire scene evaluations. Every EFI Global fire investigator is qualified in origin and cause investigations and receives ongoing training to stay up to date on changing industry standards. We bring clients the highest technological and scientific services available, and we facilitate careful evidence collection, testing and storage.

- Component testing
- Evidence collection and storage
- Expert witness testimony
- Failure analysis
- Fire investigation training
- Fire scene assessment and reporting
- Incendiarism and fraud assessments
- Laboratory analysis
- Large loss and explosion investigations
- Liability assessments
- Litigation support
- Marine fire investigations
- Metallurgical and materials analysis
- Origin and cause
- Subrogation, fraud and liability investigations

## Specialty and consulting services

In order to support our core forensic services and client needs, we also offer other specialized services. Our accredited professionals possess unmatched experience, education and training and are often called upon to provide independent expert testimony.

- Fire risk assessment
- Community risk assessment
- Community risk reduction planning
- Product failure analysis
